

Alan Jetar
Junior DevOps Engineer

e-mail: Alankonnect@gmail.com; tel: +37061880077; birth: 2005-07-15; website: jetar.lt

Education and Qualifications

2019-2022 **NKKM C++, C#, Python Courses**
Vilnius

Work Experience

- 2022.09 – 2026.06** **SeekBetter (UAB Umina)** Vilnius, Lithuania
Fullstack Developer → Junior DevOps Engineer
- Migrated legacy WordPress/PHP ERP into a scalable React + REST API application; improved load times and maintainability across multi-country factory deployments.
 - Built a multi-tenant SaaS subscription platform: custom subdomains per client, Stripe billing, Docker Swarm deployment with plan-based resource limits.
 - Implemented full logging infrastructure, health monitoring, load balancing, and horizontal scaling support for high-demand clusters.
 - Migrated legacy Apache/Linux servers to fully documented Ansible playbooks and automated Docker deployments, eliminating manual configuration errors.
 - Stack: Docker, Docker Swarm, Ansible, Terraform, Linux, Stripe, React, TypeScript, PHP, GitLab CI/CD.
- 2025.01 – 2025.06** **NKKM** Vilnius, Lithuania
Programming lecturer
- Teaching students basic programming principles.
 - Creating an environment where students can feel free to create, try, innovate and learn by their comfortable pace.
 - Primarily teaching python.
-

Tech Stack

FE Frameworks	React; NextJS
AI	Claude code; Chatgpt codex;
BE Frameworks	ExpressJS; NestJS; FastAPI; WordpressAPI
Databases	MySQL; MongoDB
Web Servers	NGINX; Apache
Linux Servers	Ubuntu Linux
Containerization	Docker; Docker Swarm
IaC / Automation	Terraform; Ansible
CI/CD	GitLab CI/CD
